PRODUCT INFORMATION SHEET

Yellow & Blue Sticky Cards Traps

Instructions:

1. Attach one hanger to each Card Trap.
2. Hold the card trap by the non-sticky upper edge; peel off release sheet to expose sticky surfaces.
3. Place traps in desired location (See guidelines below).
4. Check Card Traps weekly and, if monitoring, record catches.
5. Expect to replace Card Traps every few weeks. Under harsh field conditions (e.g. extreme winds, heat or dust) they may need more frequent replacement.
6. Use catch information to fine tune insect management programs or reduce adult populations (consult local pest management experts)

Card Trap Placement:

Place the cards so they are free of foliage and visual obstructions. Rough guidelines are suggested but growers are recommended to seek the advice of local pest management experts.

Greenhouse:

Hang traps 15-20cm (6 to 8 inches) into upper foliage

Monitoring

-use 3 traps for growing areas less than 93m^2 (100ft^2)

-Add one card for every 93m^2 (100ft^2)

Mass Trapping:

-Increase trap placement density, initially consider a five-fold increase (i.e. 1/18m^2 (1/200ft^2) and adjust as needed)

-lower traps deeper in the foliage (e.g. 12")

Field Monitoring (only):

-Position traps on stakes 30-50cm (1-1.6ft) above ground, in grind pattern

-seek local advice on placement density

Orchard Monitoring (only):

-hang from tree branches, free of shading foliage 1.3-2m (4-6ft) above ground in grind pattern

-seek local advice on placement density
